

It's showtime! Are you ready?

First impressions say a lot—and that is never more true than at an event. ActiveEvents Onsite™ solutions ensure your attendees have a positive experience from start to finish. ▶

Without question, onsite performance is what matters in the end. With ActiveEvents, you get proven on-site solutions plus innovative on-site tools that are tightly integrated into ActiveEvents Conference™. Now all of your attendee registration information, session schedules, survey responses, and exhibitor lead retrieval scans are located in one system so you can quickly report on your attendees interests as individuals or analyze this data as a whole—providing invaluable insight for your sales team and your entire organization.

Onsite Check-in System and Badging

Our check-in and badge printing systems are robust enough to handle even the most demanding check-in rush and work with or without an Internet connection. We offer self check in and remote check in options.

Session Monitoring and Access Control

Monitor and control session attendance and manage session room capacities.

Event and Session Surveys

Easily build online conference and session surveys and have these pushed to a desktop or mobile device. Session surveys are automatically displayed after your attendees finish a session.

Polling and Feedback

Get instant feedback with audience polling via SMS messaging with the ability to display real-time results in a keynote or breakout session.

Materials Management & Gift Redemption

Automate your materials distribution (i.e., conference bag, shirt) and gift redemption and ensure the right items get in the hands of the right attendees.

Lead Management

Our enterprise-ready, integrated lead management platform offers easy-to-use wireless lead retrieval units transmitting real-time leads directly into the system.

Internet Kiosks

Attendee kiosks can be accessed via a quick badge scan giving each immediate access to their schedule, communities, surveys and more.

Digital Signage

Our Digital Signage solution allows you to easily push information across flat screen monitors and have it communicated to your attendees immediately.

1D and 2D Bar Coding or RFID Onsite Activity Tracking

Multiple activity tracking options including standard 1D, 2D and RFID technology to monitor all your attendee activities.
