

8 million registrations. 150,000 + events. Need we say more?

RegOnline™ offers fast, reliable and cost effective event management solutions to help launch your event web site and online registration fast ▶

We deliver a proven solution—trusted by thousands of companies just like yours—that helps you simplify your event processes, save you time, and money.

Save Time.

Over 40,000 event organizers trust ActiveEvents to manage their events—and cut their workload in half. Build your own event web site, registration form, surveys in just a few minutes and have your event site up by the end of the day.

Save Money.

With no hosting fees, free support, and as little as \$3.95 per registrant, ActiveEvents RegOnline™ solution will save you money. Our pay-as-you-go pricing gives you the flexibility to pay for only what you need.

Simplify.

Now with ActiveEvents RegOnline, you can create custom web sites; send targeted emails with easy-to-use HTML templates, and process registrations in a matter of minutes. No need for a developer or HTML skills. What's more, you can manage all of your contacts in one location with instant tracking and reporting on a specific event or across multiple events.

Powerful functionality combined with unparalleled ease of use.

Web Sites and Email Marketing

We give you the tools to automate your communication—Build your own event web site and send top-performing email invitations with triggered follow ups and reminders.

Payment Processing and Security

Save valuable time by instantly processing credit cards online. We give you the technology to process 7 different forms of payments easily including all major credit cards in addition to checks, purchase orders, and more.

Online Registration Forms

We put our registration forms through hundreds of hours of user testing so your attendees can experience easier registration. You can easily customize each form in minutes to match the look and feel of your event.

Event Intelligence Reporting

We give you the power to create and share any report in real time, eliminating inconsistent data and cutting hours of administrative work.
